OBJECTIVE

To become an exceptional engineer and collaborator, and learn from the best through meaningful projects that share my values.

PORTFOLIO PROJECTS

***Linktr.ee* Clone** — *ReactJs, Typescript (front+back), NodeJs, Nginx, SQLite*

Features secure authentication from scratch, database, file upload, Stripe API

➜ https://linkhub.nathan-guilhot.com

Virtual Address Book — *VueJS, NodeJs, Nginx, SQLite, Auth0*

Features authentication and authorization, database, file upload and web crawling. ➜ https://namenook.nathan-guilhot.com

EXPERIENCES

Freelance programmer and code publisher   *2021 - Present*

I helped dozens of clients in Python and Ren'Py through small and commercial projects. I wrote extensive documentation aimed at non-coders (30 pages exemple: clic.nighten.fr/documentation). Using my experience, I have created code assets that have been **downloaded more than 6,500 times**.

Extensive experience in self-hosting   *2017 - Present*

I have hosted my own website for 7 years now . Among other things, I have ran the following on both VPS and shared hosting:

Wordpress, custom blog system, portfolios, analytics tools, e-commerce store, public CRUD application, URL shortener, *Nginx* reverse proxy, and my own *Mastodon* instance *(decentralized social media)*

Life long pursuit of learning through projects

I have **published more than 20 games** in various engines (nighten.itch.io), and completed personal projects in JavaScript, PHP, Python, Lua, C# and C

EDUCATION AND TRAINING

Web Development Bootcamp   *Simplon (France): 2018 - 2019*

Intensive training with a wide overview of web technologies: CSS/Bootstrap, PHP (Wordpress, Symphony), MySQL, NodeJS, Git, and React

Baccalaureate (French high school diploma) Science and IT: 2017

My interest goes beyond coding, as I'm also interested in business, language learning and digital illustration.
